

Virginia (Gina) Rey is a technical staff member who works as a radiological engineer in the Environment, Safety, and Health (ESH) Division's Radiological Protection Services Group (ESH-12). Eighteen years ago Gina joined the Laboratory as a technician in the ESH Division at Los Alamos after having pursued a brief teaching career in Texas and Los Alamos. While working as a technician, she returned to school and obtained a master's degree in Nuclear Engineering. Gina performs radiological assessments of nuclear projects and experiments, excavation permitting activities, and new sites for nuclear and non-nuclear structures. She has served as ESH student program advisor since the inception of this program in ESH division.
